

HORIZON

engineering

Artificial Lift

Energy Recovery System

power of hydraulics combined with
automated electronic solutions

smarter. stronger. saver.

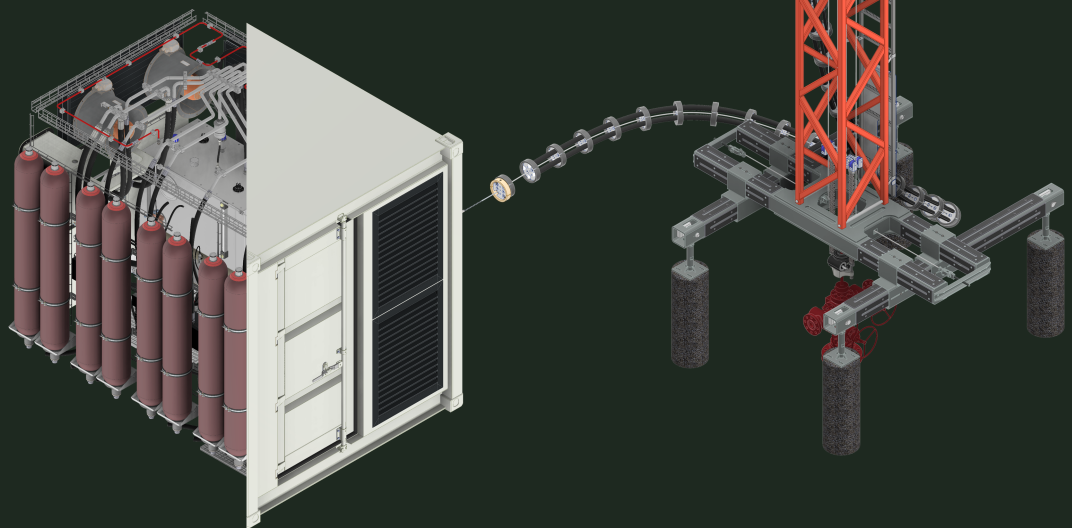

40'000 LBF
rod weight

5'000 PSI
pressure

240"
stroke length

2.5
stroke / min

international patent pending

in a 10-foot container

SWISS MADE

NEXT-GEN HYDRAULIC LONG STROKE ROD LIFT PUMP

4.0 industry

self-adjusting counterweight

real-time pump control

standardized components

cost-efficient well operations

life-cycle management

decrease in operating expenses

oil production cost savings

lowered power consumption per BBL

reduced carbon footprint
